LIST OF CONTENTS FOR VOLUME 18, 1991

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1991 Volume 18, Number 1 January-February

Contents

J.D. Jenkins, B. Gay and S.P.S. Nibber	1	Shellside heat transfer coefficients in cylindrical heat exchangers. Variation along the exchanger length. 1. The no-leakage case: experimental
G. Guiffant, P. Flaud and L. Royon	11	A phenomenological description of the progression of a freezing front in a slab. Application to a new heat storage material
A. Steinfeld	19	Exchange factor between two spheres placed at the foci of a specularly reflecting ellipsoidal cavity
T.H. Hwang and M.K. Jensen	27	An analysis of convective heat transfer to laminar dispersed flow in eccentric annuli
Y. Joshi and R.A. Paje	39	Natural convection cooling of a ceramic substrate mounted leadless chip carrier in dielectric liquids
J.C. Roy and G. Le Palec	49	Convection mixte dans un te convergent
J.G. Maveety and J.R. Leith	59	Heat flux at secondary bifurcation in Rayleigh-Benard convection with air in a rectangular container
A. Carotenuto, F. Fucci and G. La Fianza	71	Adsorption phenomena in porous media in presence of moist air
A. Bejan and D.A. Nield	83	Transient forced convection near a suddenly heated plate in a porous medium
F.C. Lai	93	Coupled heat and mass transfer by mixed convection from a verical plate in a saturated porous medium
A. Macias-Machin, L. Oufer and N. Wannenmacher	107	Fine wire convective heat transfer to water at small heat flux values
J. Kalkkinen, T. Vesala and M. Kulmala	117	Binary droplet evaporation in the presence of an inert gas: an exact solution of the Maxwell-Stefan equations
C.-H. Cheng and C.-J. Weng	127	Flow reversal of combined convection in a vertical rectangular duct with unequally isothermal walls
M. Mathioulakis and M. Grignon	141	Statistically dominant structures of fluctuations in free convection along a vertical flat plate
A.R. Mansour and B.A. Jubran	153	An approximate analytical solution to convective laminar heat transfer flow within the trombe wall channel

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1991 Volume 18, Number 2 March-April

Contents

K. Vafai	161	A survey of heat transfer phenomena in glass-to-metal seals
K. Vafai	171	Analysis of heat transfer phenomena in glass-to-metal seals
S.-H. Chang, W.-P. Baek and J.-W. Park	185	Classification of critical heat flux patterns using enrtropy minimax principle
P.R. Chappidi, C. Unal, K.O. Pasamehmetoglu and R. A. Nelson	195	On the relationshiip between the macrolayer thickness and the vapor-stem diameter in the high-heat flux, pool nucleate boiling region
M. Ramirez de Santiago and C. Marvillet	207	Pool entrainment phenomenon: Measurement of size and velocity distributions of droplets at several distances above the bubbling surface
S.C. Saxena, N.S. Rao and A.C. Saxena	219	Correlation of heat transfer and gas holdup data from slurry bubble columns
B. Siwon	229	Comparison of heat transfer from a warm flat surface cooled by impinging a liquid jet and a gas-liquid spray jet
J.C. Elicer-Cortes, D.-K. Son and J. Coutanceau	239	Caracteristiques turbulentes d'un ecoulement en convection naturelle dans une cavite diedrique
C.A. Roberts, N.S. Girgis, J.R. Leech and I.V.F. Viney	251	Mass transfer from an opaque swollen polymer measured by a projected fringe optical technique
D.W. Weiss, L.A. Stickler and W.E. Stewart, Jr.	259	The effect of water density extremum on heat transfer within a cylinder containing a heat-generating porous media
H.Y. Zhang, M.A. Ebadian and A. Campo	273	An analytical/numerical solution of convective heat transfer in the thermal entrance region of irregular ducts
Announcement	292	A Tribute to Max Jakob
Announcement	293	Second World Conference on Experimental Heat Transfer, Fluid Mechanics and Thermodynamics
Announcement	294	Modern Developments in Boiling Heat Transfer and Two-Phase Flow
Announcement	295	Twenty-Second Midwestern Mechanics Conference
Announcement	296	Eleventh National Heat and Mass Transfer Conference

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1991 Volume 18, Number 3 May-June

P. Papadopoulos, C. Chang, D.M. France and W.J. Minkowycz	297	Mass flux effects in post-CHF swirl heat transfer
C.C. Lee, Y.K. Chuah, D.C. Lu and H.Y. Chao	309	Experimental investigation of pool boiling of lithium bromide solution on a vertical tube under subatmospheric presures
J. Zhang and J. Orozco	321	Subcooled nucleate boiling from a horizontal multicylinder bundle in pool boiling
G.-J. Lee and S.-H. Chang	333	Physical modeling and finite element method for the analysis of lateral phase distribution phenomena
C.E. Park, S.S. Kim and K.-S. Chang	343	Branching solutions to inward melting problem in a horizontal tube
R.A. Seban	351	Remarks on the freezing of a binary solution
C.M. George, D. Poulikakos and J. Bowman	361	High speed flow of air-oil mixtures in converging-diverging ducts
W.-S. Fu, Y.-H. Jou and C.-H. Lee	373	A transient natural convection in an annular enclosure
A.V. Shenoy	385	Criterion for transition to turbulence during natural convection heat transfer from a flat vertical plate to a power-law fluid
T.C. Balachandra, K. Ravindran and G.R. Nagabhushana	397	Numerical estimation of hotspot temperatures in electrodes subjected to pulsed electron beam heating in vacuum

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1991 Volume 18, Number 4 July-August

Contents

F.F. Hatay, W. Li, S. Kakaç and F. Mayinger 407 Numerical and experimental analysis of unsteady laminar forced convection in channels

L.-K. Yang 419 Combined mixed convection and radiation in a vertical pipe

I. Dincer 431 A simple model for estimation of the film coefficients during cooling of certain spherical foodstuffs with water

F.C. Lai 445 Non-Darcy natural convection from a line source of heat in saturated porous medium

J.F. Gabitto 459 Effect of the microstructure on anisotropic diffusion in porous media

S.C. Saxena and B.B. Patel 467 Heat transfer investigations in a bubble column with immersed probes of different diameters

Y.L. Lee and J.R. Maa 479 The effects of surface diffusion on the growth of thin film

S.K. Roy and S. Sengupta 495 An evaluation of phase change microcapsules for use in enhanced heat transfer fluids

S.M. Zubair and K. Shamsher 509 Conduction of heat across rectangular partitioned enclosures: An analytical solution

L. Malinowski 523 Effect of relaxation of internal heat source capacity on the temperature field in the semi-infinite body

L.J. Forney and G.C. Fralick 531 Frequency response of a thermocouple wire: Effects of axial conduction

S.M. Sami amd T.N. Duong 547 Experimental study of the heat transfer characteristics of refrigerant mixture R-22/R-114 in the annulus of enhanced surface tubing

H. Yüncü and S. Yamaç 559 Laminar natural convective heat transfer in an air-filled parallelogramic cavity

L.P. Chua and R.A. Antonia 569 Spectral analogy between temperature variance and turbulent energy in a circular jet

V.G. Dovì, A.P. Reverberi, L. Maga and G. De Marchi 581 Improving the statistical accuracy of dimensional analysis correlations for precise coefficient estimation and optimal design of experiments

M. Danis and J. Gounot 591 Influence de la longueur de l'enchantillon sur la mesure simulee de conductivite thermique d'un materiau heterogene

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1991 Volume 18, Number 5 September-October

Contents

Y.H. Mori and F. Isobe	599	A model for gas hydrate formation accompanying direct-contact evaporation of refrigerant drops in water
Y.-X. Tao, R.W. Besant and K.S. Rezkallah	609	Modeling of frost formation in a fibrous insulation slab and on an adjacent cold plate
M.-H. Chun, D.-S. So and C.-S. Lee	619	A parametric study of the high pressure melt ejection from two different scale reactor cavity models
I. Dincer	629	An approach for determining the temperature distributions during heating of plate products
Ch. Charach, Y. Keizman and M. Sokolov	639	Small Stanton number axisymmetric freezing around a coolant-carrying tube
J.L. Baliño and J. Converti	659	Critical heat flux in horizontal annular channels with variable eccentricity
R. Smyth and Y.K. Salman	669	Combined free and forced convection heat transfer in a rectangular duct
A. Aittomäki and A. Aula	681	Determination of effective thermal conductivity of adsorbent bed using measured temperature profiles
J.T. Hong, S.L. Chen and S.C. Wang	691	Effect of noncondensable gas on the performance of a two-phase closed thermosyphon with wall conduction
M.-C. Wu and C.-C. Hwang	705	Nonlinear theory of film rupture with viscosity variation
A. Faghri and L.C. Chow	715	Annular condensation heat transfer in a microgravity environment
M. Henrion and M. Feidt	731	Comportement en regime transitoire de divers types d'echangeurs de chaleur; modelisation et consequences
J.-H. Tsai	741	Double spherical harmonics approximation applied to combined conduction-radiation in a planar medium
Announcement	757	International Symposium on Heat Transfer in Turbomachinery
Announcement	758	Fourth Brazilian Thermal Science Meeting, ENCIT-92

1991 Volume 18, Number 6 November-December

Contents

E. Choi, Y.I. Cho and H.G. Lorsch	759	Effects of emulsifier on particle size of a phase change material in a mixture with water
H. Chegini, S.K. Chaturvedi and N. Kondic	767	Heat and mass transfer from a supercritical LOX spray
J.A. Manrique	779	Thermal performance of an ammonia-water refrigeration system
Z. Alikhani and G.S.V. Raghavan	791	Simulation of heat and mass transfer in corn-zeolite mixtures
S.M. Zubair and M.A. Chaudhry	805	Temperature solutions due to continuously operating spherical surface-heat sources in an infinite medium
A. Aziz and V. J. Lunardini	813	Application of local similarity method to nonsimilar conduction controlled freezing problems
S.-C. Chen and S.-Y. Hu	823	Simulations of cycle-averaged mold surface temperature in mold-cooling process by boundary element method
S.-C. Chen and N.-T. Cheng	833	Simulations of post-filling process considering the cooling effect of the mold cooling system
C.B.C Raj and J. B. Hunter	843	Analysis of Joule heating in electrophoretic processes
H. Saraç, A.A. Wragg and M.A. Patrick	853	Combined heat and mass transfer by natural convection at horizontal cylinder electrodes
C.Y. Wang	865	Point source in weak shear flow
F.C. Lai	875	Non-Darcy mixed convection from a line source of heat in saturated porous medium
	889	LIST OF CONTENTS FOR VOLUME 18, 1991
	895	AUTHOR INDEX TO VOLUME 18, 1991
